

Open Office Writer

Writer is the word processor contained in Open Office. Open Office is a suite of programs including a word processor, a spreadsheet, a presentation capability, mathematical formula, and a drawing function. Writer is similar to pre 2007 version of MS Word. The programme is free.

The look and functionality is similar to versions of MS Word prior to version 2007. Compatibility is generally maintained but the more a Word document is formatted the less will be carried over in a conversion to Writer.
